

Brix Construction Update

Schnitzer West has selected Portland-based [Andersen Construction Company](#), in partnership with [Charter Construction](#), to put the finishing touches on the Brix project. Andersen Construction Company is well known for its extraordinary work throughout Portland's famous Pearl District and will be the construction manager. Andersen will be partnered with Seattle-based Charter Construction, who will be providing additional labor forces.

This team will ensure that upon completion Brix will meet everyone's high expectations for the project. We are excited to have this outstanding construction team on board to complete construction at Brix.
